

Mini Calculator

1. Implement the below design using HTML & CSS (**Hint:-** Use Bootstrap grid system)

2. Implement the functionality of the calculator you've created.

Expected functionality:-

Once a user clicks on a button, the value of that button should be displayed on the screen. For example, consider the following scenario.

- I. User clicks on the button " 5 "

- II. User clicks on the button " * "

5*	C
-----------	----------

III. User clicks on the button “ 9 “

5*9	C
------------	----------

IV. User clicks on the button “ = “

45	C
-----------	----------
